

A woman with long dark hair, wearing a grey beanie, a grey sweater, and a bright yellow high-visibility vest with reflective silver stripes, stands on a gravel shoulder next to a red car. She is holding a red smartphone to her ear with her right hand and resting her left hand on the car's roof. The background shows a road winding through a hilly, wooded area. The text 'HI-VIS' is overlaid on a yellow rectangular background in the middle-left of the image.

**UNIQUEFORM  
WORKWEAR**

# HI-VIS

**Get the driver's attention!**

## #1. Construction Activities

Construction workers must be visible to ensure their safety. Construction workers typically wear vests in fluorescent colours. They facilitate employee identification.

## #2. Traffic Activities

Highway users need reflective safety jackets where the speed of the car is around 80 kms. Most of these traffic safety vests have a zippered front closure and are made of fluorescent fabrics.

Why do we need to wear the safes vests on highways?

### 1. Car speeds have increased recently.

A driver can observe/react in two seconds. Using a mobile phone, talking to someone, or looking at other things reduces the driver's reaction time.

- Reflective material is effective during the day and at night. At dusk or during low-light conditions, such as fog, it is most effective:

2. It is highly effective when there's a light source, such as headlights. It shines a bright white in response to light.

3. The National Safety Council reports nearly 80% of pedestrian deaths occurred in the dark in 2019.

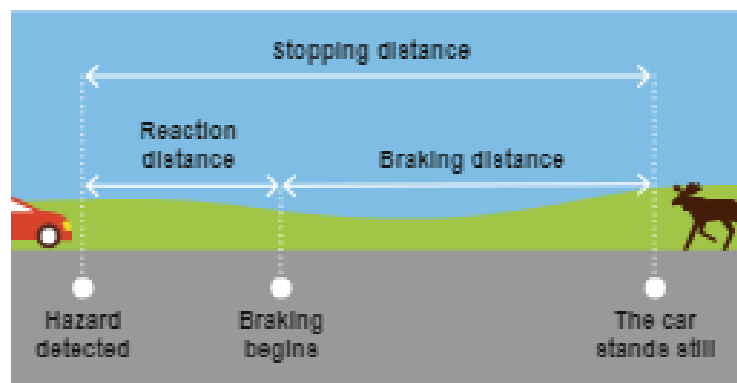

# HI-VIS

The driver has just 2 seconds to know you're there

## Reflective Vest- HVV01

- The highly visible vest allows you to quickly and easily enhance your protection in a crucial time by improving your visibility at roadworks or in low-light conditions.
- The body fabric is a cotton/polyester bright yellow and the seams are covered with piping to increase durability.
- 2" Reflective bands all around, including over the shoulders so that you're highly visible from all directions – even when bending down.
- Features two front pockets with flaps, perfect for a mobile phone, PDA or glasses
- Wide arm openings for maximum freedom of movement and perfect fit over a jacket
- ZEE Zipper at front for maximum convenience

### **Your reaction time.**

Normally 0.5–2 seconds.

45–54 year-olds have the best reaction time in traffic.

18–24 year-olds and those over 60 have the same reaction time in traffic.

Young people have sharper senses but older people have more experience.
